Isn't It Romantic?

The Simple Elegance Of Romantic Rural

There's a romance developing in the world of interior design. We're talking, of course, about Romantic Rural interior design.

For years now, various styles with "farmhouse" or "country" names have come in and out of style. Well, if any of those styles have intrigued you, you're in luck.

Romantic Rural is the meet-cute of styles like English Cottage, French Country, Cottagecore, and Modern Farmhouse design. Basically, think of a design style with the word country or farmhouse, and it's part of the inspiration for Romantic Rural design.

If you find that notion as romantic as its name, today we have a treat for you. We've gathered expert insights to simplify Romantic Rural interior design into one easy read.

DESIGN IDEAS & INSPIRATION

For The Love of Colors

Let's kick things off on a soothing, colorful note. Now that you know the delicious layered design cake Romantic Rural interior design is, you won't be surprised to learn that we're not talking about an electric South Beach Miami kind of color palette.

Romantic Rural's hues have a much more mellow, soothing intensity. As Keely Smith, lead interior design specialist at JD Elite Interiors, shares with [The Spruce](#), "Think light shades like creams, blush tones, faded blues, and soft greens."

Imagine the feeling of enjoying a quiet morning cup of tea while looking out at a thriving garden in full bloom. Those kinds of colors — muted, alive, and earthy. Designer Shannon Claire Smith explains the idea in [Martha Stewart](#) magazine, "These homes and spaces are meant to be lived-in and enjoyed, and the design aesthetic reflects that."

Lived-in. Comfortably and softly. That's the color of Romantic Rural. For love of patterns.

For The Love of Patterns

Besides that lived-in feel, patterns are what's most immediately recognizable in Romantic Rural design. Fittingly, patterns dance between traditional dressy vibes and a casual, unrestrained vibe. Almost like the puckish energy of kids playing dress up.
